

Power Standards Lab ATT2-600V - AC-DC Voltage Current 600VDC 300VAC

PQube Plug-in Modules and Accessories

Compact voltage and current module for connection to PQube's analog channels (AN1 - AN2). Great for applications where high voltage DC monitoring is required. Can also be used to monitor high voltage AC.

- $\pm 600\text{VDC}$ or 300VAC , CAT IV
- $\pm 10\text{V}$ current transducer input
- Over 7 kilovolts of isolation to protect against faults
- High voltage terminals are standard shrouded safety banana jacks - on 0.75in centers, just like a digital voltmeter
- 1 meter shielded cables to permit location of module in high voltage area.
- Module dimensions: 5" x 2.6" x 1.2" (127mm x 66mm x 30mm)
