

## Power Standards Lab THC Extension cable for T-H Probe

### PQube Plug-in Modules and Accessories

Your PQube accepts up to two Temperature - Humidity probes (TH1's).

- These probes can be directly plugged into the back of your PQube, or alternatively, you can monitor the temperature and humidity at locations away from the PQube by using the THC extension cable.
- The THC cable is approximately 6 feet (2 meters long). For greater distances, five cables can be connected end to end (30 feet (10 meters long)).
- TH1 probes are ordered separately.
